Title: METHOD AND APPARATUS FOR TREATING A SUBSTRATE

REPLY TO RESTRICTION REQUIREMENT

**Mail Stop Amendment**  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

In reply to the Office Action dated October 20, 2008, the period for reply being November 20, 2008, Applicants hereby elects the invention of Group I, claims 1-15 and 31, drawn to a method for treating a substrate. This election is made with traverse.

In the Restriction Requirement, the Examiner alleges that Groups I, II and III are not related to a single general inventive concept under PCT Rule 13.1 because U.S. Patent Application No. 2003/0049468 to Hu *et al.* ("Hu") allegedly anticipates the claimed apparatus of Group II. Applicant respectfully disagrees.

The Examiner states that Hu teaches, among other things, that the substrate is situated below a plasma source and advantageously placed to move in respect to the plasmas source. However, the claims do not merely recite that the substrate is

configured to move with respect to the plasma source. Rather, claim 16 of Group II, for example, recites “***during use ... the plasma source and/or a fluid supply source is moveably arranged.***” (emphasis added). Hu does not teach this feature of Groups I-III.

Accordingly, reconsideration and withdrawal of the Restriction Requirement are respectfully requested.
